

ChemicalInfo Announces Joint Partnership with MOLBASE.COM

MOLBASE.COM Active Field Verified Suppliers now featured in the Directory of World Chemical Producers (DWCP)

DALLAS, June 27, 2017 /PRNewswire/ - ChemicalInfo, providers of the most comprehensive online databases for chemical and pharmaceutical companies and those who do business with them, jointly announces a partnership with MOLBASE.COM, the world's leading chemical B2B platform, serving the global chemical, pharmaceutical, new materials and other industries. The partnership allows ChemicalInfo Directory of World Chemical Producers (DWCP) subscribers to view MOLBASE.COM Active Field Verified Suppliers within the DWCP search results along with a direct link to the respective e-commerce supplier page on MOLBASE.COM.

In 2016, both companies determined the need to increase the visibility of qualified manufacturers in the market as well as offer digital purchasing options to today's procurement and sourcing professionals. Integrating MOLBASE AFV supplier data into ChemicalInfo's DWCP database allows DWCP subscribers to view high-quality, active, qualified foreign producer information. At the same time, ChemicalInfo members will be able to click on the manufacturer's link to reach its website on the MOLBASE.COM platform to learn more about the manufacturer, including company information, main products, raw material origin, and even online inquiry. This greatly simplifies and speeds up the transaction process for its users.

It is worth mentioning that the manufacturers listed in the DWCP through this partnership are those with the Active Field Verification certification authorized by MOLBASE.COM. They have been audited by professional forensic staff door-to-door for the company operating conditions, plant environment, the main products, enterprise strength and field shooting forensics. This is not only for ChemicalInfo global buyers to provide more reliable choice and valuable purchasing decisions, but also reflects the "customer first" business philosophy of MOLBASE.COM and ChemicalInfo.

ChemicalInfo subscribers can now click a link featured on a company listing in the DWCP and visit a MOLBASE.COM AFV Supplier Ecommerce store page.

Join other MOLBASE AFV manufacturers now featured in ChemicalInfo's Directory of World Chemical Producers (DWCP) to connect with global ChemicalInfo subscribers by submitting a [Request to List](#) now.
