

The Anatomy of a Company Profile

What it takes to be the Global leader in chemical supply chain data.

Directory of Producers Profile Contacts

Providing contact details is a key component that makes profile and listed company information so valuable. To gather this data, we have a fine-tuned process that includes:

Internal Research Department – Chemists on staff able to make routine updates to contact details and provide custom support to clients and updated contact information for listed companies

Online Sources – Our Research Department analyses data from a variety of online sources to verify accuracy before entering information into a company profile

Online Sources – Our Research Department analyses data from a variety of online sources to verify accuracy before entering information into a company profile

Regular email testing with 3rd party tools to ensure accuracy for all working emails

Global agents and email campaigns – Global network and email campaigns help us to connect with companies from all over the world and streamline contact additions and updates

The Main Profile

The Information in the top section of every company profile remains the same within each product. Company headquarters such as address, company type, description, social media links, company logo and a main company contact are all visible in the main company profiles section. A direct link to our in-house research department is also available on every company profile if at any time a member has a question concerning a listing.

The screenshot displays a company profile for 'Company A'. At the top left is a logo with the word 'EXAMPLE' in a red box. To the right of the logo are social media icons for Facebook, Twitter, LinkedIn, and YouTube. The main header area contains the company name 'Company A' and the following details: Manufacturer, Address Line 1, Address Line 2, City, 13456, Andorra, Phone: +1 (152) 3456-7896, Fax: +1 (152) 3456-7899, www.website.com, Email: Contact@Company.com, and Company type: Life Sciences - Pharmaceuticals. A green progress bar indicates 'Profile Complete: 95%'. Below this is a 'Submit a Research Request' button and a 'Looking for more?' link. The 'Description' section states: 'Company A is an integrated Pharmaceutical Company manufacturing a large range of products, including both Active Pharmaceutical Ingredients and Finished Dosage Forms. Our products are registered globally and its facilities meets international standards. Company A is focused on improvement in technology and new products duly integrated through their sophisticated Research & Development department.' Below the description is a 'Product Catalog (341)' section with tabs for 'Profile', 'Product Catalog (341)', and 'Company Notes'. Underneath are expandable sections for 'Locations', 'Contacts', 'Certifications', 'Export', 'Import', and 'Media'. The 'Export' and 'Import' sections show a 'DataMyne' logo and a link 'Why don't I see any trade data?'.

We regularly interact with listed companies to verify product catalog information

Address information is carefully researched to ensure that in addition to standard company head quarter information, we include locations such as sales offices, production locations, research locations etc.

Our partnership with DataMyne allows our subscribers to access global trade data that is updated on monthly basis. Trade data integration helps monitor global activity with a complete picture of what commodities are produced, used and sold by specific regions which is critical when making sourcing decisions

We regularly verify manufacturing capability using certifications from public sources and listed companies. These files include ISO, GMP, REACH, EDQM FDA compliance through DMF verification, Halal and Kosher
